CRADE CROSSINGS.

Matter of Importance to Lowell Where Crossings are in Heart of BOSTON, Aug. 1 The report of the BOSTON, Aug. 1 The report of the commissioners appointed to devise a plan for the abolition of grade crossings on George, Church, Rogers and Lawrence streets in the heart of Lowell, was to-day confirmed in the equity session of the supreme court by Chief Justice Mason. These crossings are along the line of the Lowell and Andover branch of the R. & M. system.

Postponed to Next Week. vicht Hynat a has arrived from Relfast. The steam yacht Jathaniel has sailed

son. These crossings are along the line of the Lowell and Andover branch of the Bos. & M. system.

By the terms of the report there is to be a branch road built in accordance with the act of leg slature of this year to begin at the bend of the Lowell & Andover K. R. on Lawrance street and to connect with the main line of the Boston & Maine system. This arrangement provides that the regular passenger and freight traffic on the Lowell & Andover shall arrive and de-art from the Boston & Maine stations instead of the old station on the former line. The part of the Lowell & Andover bandoned for regular service will be retained for the special accommodation of merchants having places fronting along it.

By this plan the only grade crossing that will be abolised is the Lawrence street north crossing and the railroad at the beauty will be retained to the Lawrence street north crossing and the railroad at the station with a band, because the Lawrence street north crossing and the railroad at the station with a band, because the Lawrence street north crossing and the railroad at the station with a band, because the Lawrence street north crossing and the railroad at the station with a band, because the Lawrence street north crossing and the railroad at the station with a band, because the Lawrence street north crossing and the railroad at the country of the lawrence at the lawre parations for entertaining the party, that will be abolished is the Lawrence street north crossing and the railroad at this point will be railsed tver the highway. The commissioners were dec. W. Wiggin and Samuel L. Mit at, of Boston, and John W. Ellis, of Wooncocket, R. I. There is no objection to the confirmation of the report.

SEA SEFPENT CAUGHT

turned out Tuesday evening, and, ac- At Orono, Thursday and Friday cording to their account, captured a sea 2.50-Class Trot and Pace. sailing through the East river, evidently making a short cut from Long Island At Oldiewn, Friday and Saturday Sound, where he has been playing to crowded houses, to the New Jersey coast resorts, which he was to take in as part of his summer carenit. Owing, no doubt, to his attention being distracted

e part of his summer circuit. Owing, no doubt, to his attention being distracted by the many odd signts and sounds at the circuit. Then the guards at Blackwell's Island attacked him and dragged him ashore.

A great difference of opinion exists as to the circumstraces of the capture. But the one grand fact remains that the serpents, or one of him, is caught; that is the stand of the medical staff on Blackwell's Island attacked him as to rea serpents. Dr. George T. Stewart, chief of the staff of the Metropolitan Hospital on the island, made the following important statement tonight: "Of course convincing proof as to the identity of the beast can only be had by a careful autopsy, but I have little doubt that it is a genuine set scripent. At any rate, it is a good enough sea serpent for me, as twenty-five feet long and has a short bead and a short tail. His capture saw very little difference between his shape and that of an ordinary ratticesnake. He has large, sharp teeth, and with these the made violent attempts to bite them.

Ray On a Reaf.

The sea serpeat betrayed his presence to one of the island guards, so they say, by his cries of distress when he found himself aground. At first he tried to clinb off the reet, but fluiding this impossible broad to the light by a light broad to the light broad to the

by his cries of distress when he found himself aground. At first he tried to climb off the reef, but finding this impossible began to yell vigorously. The night guard who lound him said that the cry sounded like one of pain from a big dog. He thought at once that a prisoner had been injured in making his escape, and was help iss. Then he went down to the water's edge, and to his horror he saw the green, sharp eyes of the awful creature looking into his with rage and bate.

the awful creature looking into his with rage and hate.

"He was mapping the teeth and foaming at the mouth." said the keeper. "His beard was covered with blood and his hair was standing on end. I didn't dare to go near him till I had summoned some other men. We attacked him in a body and he died almost without a struggle. So soon did his death occur that some of the men who were jealous of our bravery say that he was dead when we tackled him. But that's all nonseuse. He was terribly alive and hungry, too, I should imige, by the way in which he snapped at tas."

Whether this is the same sea serpent

whether this s the same sea serpent that has been sent so often in the Sound lately, is not now plan. It is generally believed by sea screent experts that there must be a school of the monsters is given. President Burrows of the consernantiflutes the failures to the fact that the bankers' dollar doubled in value while the value of the manufactures; and collar decreased and as a consequence the depreciation in really good assets makes it impossible for him to meet limited.

The Himatayas.

If, geologically considered, the higher the mountain range the more recent, it is then the Himalayas are the adolescents. It is the constant factors of mechanical abrasion or solution or transportation by the vaction of the wind that have never ceasing tendancies to lower the lof-

action of the wind that have never ceasing tendencies to over the loftiest mountain peak. That the Himalays are still unstable quantifies is shown by a mountain fall of 1893, where there was the roots the reason that the first just a piece of seaweed, but when it of lead-likes. On hill the Maiting

How Others Saw It. way, in The Contemporary Review, writes that the Himalayas are plassing through their dramatic geological period." How did primitive man manage to escape mountain slides in the early period? He could no more get rid of terrestrial cataclysms than we can today.

The achooner Hittle M. Howes has been beached at Barbour's dock and is being repaired by Mr. Thomas funnewell.

Miss Grace Perry, of New York, who has been visiting, Irlends in this city for the district of the Sacred Heart is expected to fall.

ONAHA, Neb., Aug. 1. Four people were drowned and many buildings destroyed by a terrible clouburst near Casper, Vyombag, yesterday. The flood was resistives in its headlong; course and the extent of its devastation is not yet, fully determined.

TENNIS TOURNAMENT. Budlong Defeated in Two-Set Match.

NEWCASTLE, N. H., Aug. 1 A grami-mrurise perty marked this morning's NEWCASTLE, N. H., Aug. 1 A grand surprise perly marked this morning's play in the Hotel Wentworch tennis tournament. Budlong, whom everyone had considered invingible, was defeated in a two-set match by W. M. Scudder, of St. Paul school, 8-4 6-3. The result of the Budlong-Seudder match puts the finals in fouth, and there will be a fight to the finest for first hopors. The unexpected result was due to the fact that. Budlong find an off day and could neither use his payerful ground stroke with any accuracy nor did he place at all well-back had jed, as he usually does. He did not come up to the net at all during the match.

After winning the Krat two games of the first set by smashing and well directed crossocourt drives, Hudlong began to hit everything into the net, being seemingly unable to lift the bill separts.

gan to hit everything into the net, being seemingly unable to lift the ball enough. Scudder profited by his opponent's Scudder profited by his opponent's weakness and hit everything back until Budlong beet himself.

MONEY DRAWER

Robbed of \$50 at Fair View House.
PLYMO TH, N H., Aug. 1. The money drawer in the Fair View House at North Woodstock was robbed last night of about \$50, and the key to the railroad ticket case was taken. The money drawer was found this morning under the depot. The act is supposed to have been commuted by someone familiar with the torse. with the locse.

THE INDIANS.

The total loss in Secorro and the immediate vicinity will far exceed \$100,-000. A mass meeting of the citizens was held and measures taken for the relief of the distitute. The villages of Conba, San Pedro, San Antoni and a settlement adjacent to Socorro were visited by the flood, but the extent of the damage cannot be ascertained, as it is impossible to commit leate with them: Supposed They Will Sneak Back to

July 27, 1827, and came with his parents to Boston when he was five years old. He was educated in the public achools,

Oxford.

The Chautauquans at Fryeburg, Wednesday listened to one of the fluest lectures ever delivered upon the grounds, by Col. H. B. Sprague. The first was an argument of great power to prave that Shakeapeare knew by practical expelience the ways and experiences of the soldier life. Wednesday afternoon he spoke upon "When I was in juil," giving his experience as a prisoner with the Confederates during the late war.

Sagadahoc. During a thunder shower Tuesday afternoon, a bart with its centents, owned by Alexander Bates, of Be widobam, was destroyed by lightning.

WHEELING GOSSIP

The Maire division of the L. A. W. has been constantly increasing its membership during the last six months as a result of the special effort in that line on A correspondent of an exchange, in his "high wate" mark," from which there report of the late fire at Sherman Mills, was a very perceptible dropping off, continuing up to the first of the present year. The tide has turned, and there women were cooler headed than the men," he said, "and did effective work."

year. The tide has turned, and there are now 412 members of the division, with a continuous of the division.

> The State secretary says that more attention will be paid in the future to renewals. Heretefore there has never been a thorough canvass of members near the close of the league year to influence their re naining in the division Next spring some missionary work will be done in this line, and the officers of the division predict that it will have the effect of reducing the number of lapses to a minimum. The greatest gain thi season has been hade by the Sanford Cycle Club, which now ranks third in size among the league clubs of the State. it has 39 lesgue members, beside a large number of associate members. The large addition to the league ranks in Sanford has been mainly through the solicitation of C. A. Bodwell, the local consulther .

> Sanford Lanak ng chaborate plans to entertain the Maine wheelmen at the fall meet Lubor Day. As the New England Fair is to be in progress in Portland at that time the league officials are contemplating making it a three days' meet, so as to take ir the races at Rigby on Priday and the Sauford races on Monday. Bates Torrey, ex-secretary of the Maine division an I author of the Maine

road book, is passing the summer with his family a. Falmouth Foreside. John S. Johnson will be at Righy Park during the New England fair. August 27 he will ride a mile in an attempt to beat two minutes being paced by a "quad," mounted by O'Connor Weinig, Starbrook and Seavery. The following day he will endeavor to cover two miles in less than , a m, 4s, paced by the same "quad." Tuesday's programme will infamily by taking in washing nearly every clude a mile open race, participated in by the lealing track teams. In the mile hand cap Friday Johnson will start from scratch, O'Connor at 40 yards, Weinig, 60 yards; Starbrook, 80

of the American House in Ellsworth at 3 A Lewiston young man who is a mem-ber of one of the local military como'clock Wednesday morning. The closet ber of one of the local military companies in the city got up in his sleep Monday night, donned his fatigue unform and started on a four of letty all by "his lonesomeness," but was very much surprised when he awoke at 2 A. A. to find himself in the upper end of Riverside cemetery doing plezet duty around one of the sitent monuments, and the only weapon of warfare about him was a mutch. He will apply at the next regular meeting of his company for an honorable discharge, and there is but little doubt that he will get it. is on the second floor, in the new part of the hotel. Dr. George A. Phillips, whose room is directly over the closet, was aroused by the smoke. The fire was soon extinguished. The contents of the closet were destroyed, and slight damage was done by water. The boarders in the immediate vicinity of the fire were awakened, but the fire was extinguished with so little disturbance that many in hotel knew nothing of it until morning. It was a very fortunate escape. Mr. Weeks estimates the loss at \$200, which is covered by insurance. "Matches and Portland is having a diphtheria scare; eight of the more serious cases have been removed to the pest house. mice" is the only cause that can be as-

signed for the fire. A hearing was held this week before Commissioners Danforth, Gerchell and Cornish over the boundary hetween Wiethrop and Readfield to determine in which town the summer colony of Craigs Point is bounded. According to the engineer's survey the former is favored. The final decision is reserved to October. A Palmyra, man had in his employ October.

Monday night, A. C. Wesco t, who lives in the outskirts of Hallowe I, heard a noise in his stable, but thought some of the boarders were causing It. Tuesday morning when he went to the stable, he found one horse gone, and a carr age and harness. Upon investigating, I e found the horse In a neighbor's field, with part of the harness ou, and the carriage he found by the roadside, a mile from his house, with a fish pole in it. From indications it is thought that someholy was going on a fishing trip at Mr. Wescott's expense, and also that the term ran away, as the carriage was all it and hadly broken.

veritable famine in the land. Now comes the modern "Joseph," only his name happened to be George—George Butler. Mr. Butler lived on the point then and still known as Butler's Point. He had a large and very productive farm-

replied: "Down into Egypt, to get some corn." And ever since the locality has been known as Egypt.

And ever since the locality has been known as Egypt.

The first point of the one side that will make a very unfavorable comparison for the sorubs.

gerous us Becayed Foods. Every one knows or ought to know that derayed foods are poisonous. Boards of Health seek to prevent their sale. We now have in mind the results which follow the decay and decomposition of foods after they have been eaten, for unless digestion occurs within a reasonable time after our meals, decompositionsets in. If dispepties will stop end consider for a memory some of the symptoms of their trouble, such as disagreeable breath, ernesting of gas or bad tasts in the mouth, on of gas or bad taste in the mouth, come from decaying food that ought prop-erly to have been absorbed ato the system. for Hull, England. Spots before the eyes, dizziness, sleep-isness, dyspeptic headaches are but a lessness, dayspeptic headaches are but a trew of the effects following the absorption into the blood of poisons developed from tecomposing and undigested food that hes in the stomach. S., and other points in the Provinces.

It was a recognition of this important fact that caused the Mount Lebunon shakers to devote so much of their time to the preparation of a remedy for dyspepsia, and nothing is more efficient than the Higestive Cordial which they have to cently placed on the market. His action is so prompt that relief frequently follows the very drast dose. It restores the appetite and increases the glace of weakness and that care, worn expression which points of the dyspepties in every community. The local druggists are now giving away interesting descriptive pamphlets.

In Caste is Pitcher's Caste is.

"You may be surprised at the interest I take in cycling, young man," said John sport, for the firm with which I was machine upon the market, but they

noisy one?—of thankfulness wells forth from our eye we will tell you about the game.

It wasn't a bad sort of day, 'rather cool perhaps and the sun wasn't out any too much. Braham, the inimitable, was games will be played in each city, begin in the box for Bangor and a nice looking fellow called Yerrick for the visitors, while Cray was on hand to umpire, ready as usual to give the visitors all the fine points regardless. Sleep had had no condeffect moon him and we have often. soon after M. higge, another Parisian, still further improved bleggles by making them entirely of steel and iron. The principle of crank action stached to revolving axles having also ben developed, the pastime of bleggling became more normals. popular.

Mr. Davis's Apcount.

According to the "Encyclopædia Brit-

Had Made in 1867.

Found the Wire.

Detective G. W. Harriman has retracted from a several days' trip to Aroostook county for the purpose of looking up a case of theft. Last fall two large coils of wire were stoled in the town of Blaine from the Sawyer will bear me out in what I say. My old Bros., of this city, who were constructing the Bangor & Aroostook telegraph line ard it was not until recently that a clue was obtained.

Telegraph wire is all of one size and cifferent from any other kind of wire.

Mr. Davis's Account.

Mr. Davis takes exception to some of these statements. "In 185", "continued Mr. Davis, "we were in business in New York, under the nace of Pickering & Davis, and R. I. Pascall s at present connected with the Fickering Governor Company, at Portland, Conn., and he will bear me out in what I say. My old partner, Thomas R. Pickering, sied abouts three months ago. Like many other I inventure, we were simply a few years aftend of the times. Index we patented our machine and not allowed the patent to run out, we should have made a great deal of money.

is the Provinces but Detective Earriman waited until his return and then interviewed him on the subject. A bill for the wire will be sent him by the Sawyer. Bross and if he pays, as it is thought he will, the case will go to further.

Caliber of the Ruman Intestine.

Do American citizens, as a rule, possess more voluminous intestinal tracts than their French congeners, and if so how far is cookery responsible for the difference? It is of course notorious that French cooking is the hest in the world. Has this fact any hearing upon the presumally small cultiber off the French moder, beyond. The France were made of wood, the rest of steel and from it was heavy, of rourse, and drome that idea and made our wheels advost whally of steel. Our pedals were a kind of three-square arrangement, which hoved with the toot is the pedals to to-day. The France were made of we sent them the mather of the undered with all time called "The Velocipediat," and the cut I have given you is the end time called "The Velocipediat," and the cut I have given you is the one used in that paper it that time called "The Velocipediat," and the cut I have given you is the one used in that time called "The Velocipediat," and the cut I have given you is the one used in that time called "The Velocipediat," and the cut I have given you is the one used in that time called "The Velocipediat," and the cut I have given you is the one used in that time called "The Velocipediat," and the cut I have given you is the one used in that time called "The Velocipediat," and the cut I have given you is the one used in that time called "The Velocipediat," and the cut I have given you is the one used in that time called "The Velocipediat," and the cut I have given you is the one used in that time called "The Velocipediat," and the cut I have given you is the one used in that time called "The Velocipediat," and the cut I have given you is the one used in that time called. The velocity of itself and the cut I have given you is the one used in that time called. The ve moder, bleyele.

The Present Wheel Foreshadowed. "The circumference of our wheel ran from 34 to 36 inches for the front, and from 24 to 28 inches for the rear wheel.

The circumference of our wheel ran from 34 to 36 inches for the front, and from 34 to 36 inches for the front, and from 34 to 36 inches for the front, and from 34 to 36 inches for the front, and from 34 to 36 inches for the front, and from 34 to 36 inches for the front, and from 34 to 36 inches for the front, and from 34 to 36 inches for the front, and from 34 to 36 inches for the front, and from 34 to 36 inches for the front, and from 34 to 36 inches for the front, and from 34 to 36 inches for the front, and from 34 to 36 inches for the front, and from 34 to 36 inches for the front, and from 34 to 36 inches for the front, and from 34 to 36 inches for the front, and from 34 to 36 inches for the front or the front, and from 34 to 36 inches for the front, and to 36 inches for the front, and from 34 to 36 inches for the front or secting wheel was on the front or steeling wheels with the from 34 to 36 inches for the front of the stand not not an extent vite obtained with on the m

Mr. Davis Wrote to his kill superincedent, R. H. Pascall, and preceived the following reply: "Is hall? end you by this same mail the only specified the old winter purchaser, as was one of the particular to provide the purchaser, as was one of the prochaser, as was one of the purchaser, as was one of the factory was a member of the purchaser, as was one of the factory was a member of the purchaser, as was one of the purchaser, as wa pavement then used on the New York.

New York.

"The fight wheels were generally of wood, with the except on of a few special ones constructed on the special ones constructed on the special ones constructed on the wood, with the except on of a few special ones constructed on the wood, of the present popular tauchines have followed in general design, although no notatil, the machine as manufactured by us in 1867 and 1808.
"I trust that this meagre description will be of use to you, us it is a given me much pleagure to revert to the old times and to the many pleasant incidents connected with the introduction of the wonderful vehicle that persister in keeping a vertical position when it motion on two wheels."

Wheels Ordered for Ch na.

Wheels Ordered for Ch na.
Continuing, Mr. Davis said: "Or
course, I don't claim that we introduced
the bluyels, but I think that we made
the first wheels which bere the slightest resemblance to the one how it use. I remember that Calvin & Witty made a klud of velocipeds at that the, and Demorest made something of the same order. I remember that we hid an order of ten wheels for China, but we never delivered them."

Marvelous Res. Its.

From a letter written by Roy. J.
Gunderman, of Dimondels, M.ch., we are permitted to make this extract: "I have no heritation in recon mending Dr. King's New Discovery, as the results were almost marvelous in the case of my wife. Whi e I was pastor of the Baptistic Church at Rives Junction she was brought down with Prentmonis succeeding La Grippe. Terrible paravesms off-coughing would last hours with little interruptor and it seemed us if she could not survive them. A friend recommended Dr. King's New Discovery; it was quick in its work and highly satisfactory in results." Trial bottles free at Ara Warren's Drug Stato.
